

Alliant Healthcare Products Overview

Alliant Healthcare Products is a Veteran Owned Small Business (VOSB) that designs, develops, manufactures and markets products for the U.S. healthcare market. Alliant Healthcare also provides custom assembly, packaging and manufacturing for acute care hospitals, government and original equipment (OEM) for private label customers. The market focus of the company is directed primarily towards the cardiovascular, gastrologic urologic devices markets and OEM customers.

Alliant Healthcare formally began manufacturing operations on September 1, 2002. Alliant Healthcare is now positioned to utilize its engineering, marketing and manufacturing expertise to become a significant provider of low cost, high quality healthcare products.

The management team is rich with experience. Bob Taylor – CEO, 23 years of professional business experience, proven track record of success in the healthcare industry. Steve Nederhoed – Vice President of Sales, 18 years in healthcare sales, marketing, distribution and sales training management. Taura Perrin – Controller, 13 years of extensive financial and operational experience, Senior Technology Consultant. Beth Holt – Production Manager, 25 years experience of lean manufacturing experience.

In addition, Alliant Healthcare has extensive contract packaging expertise. The company utilizes “Shop Floor Management”. The system provides the company with several critical advantages. “Quick Change” combined with “Modular Manufacturing” techniques create maximum flexibility and the ability to drive cost out of manufacturing products. Our FDA registered facility allows “plug and play” capability for a wide array of projects.

The company utilizes its sales force of over 50 sales representatives to promote and sell 25 comprehensive product lines including: Alliant TruChoice™ Branded: Foley Catheters and Kits, Temperature Monitoring Devices, Electrosurgical Pencils, Perfusion Accessories and BaroVac® Wound Drainage Systems.

Because of the Veteran Owned Small Business status, Alliant Healthcare has a unique opportunity to help prime contractors meet the demands of the Government. Any company contracted for more than \$500,000 with the U.S. Government must submit a subcontract plan prior to being awarded the contract. These subcontracts are required to include VOSBs. These goals are expected to significantly emphasize the special relationship between the US Government and Veterans. There has been no other time in our nation's history when incentives were so strong for doing business with companies under veteran ownership.

Mission:

Our mission is to be the most respected and successful veteran owned business in healthcare as viewed by our customers and employees.

Ownership:

Alliant Healthcare Products is a privately held medical manufacturer. The company is a Veteran Owned Small Business and is solely owned by Bob Taylor. Mr. Taylor was an active duty Navigator/Bombardier in B-52's and flew 11 combat missions during the Gulf War where he earned prestigious Air Force's Air Medal.

Suture Guide

Description:

The Disposable Suture Guide is commonly used during a heart valve replacement procedure. During the surgical procedure, the suture guide is used to keep suture ends organized and prevent entanglement. The multiple suture guide slots are compatible with common size sutures.

Product Material:

Base: White HDPE

Base and Inserts Material Class Approval (FDA21 CFR177.1520)

Packaging:

EtO Sterilized

Features:

- Flexible Insert: Blue PVC with 8 Numbered Slots A&B sides
- Adhesive on Base: Removable Liner to Expose Adhesive Strip
- Unique Straight Edge Design: Fits Firmly on the Chest Spreader

| Description | Eaches Per Box | Minimum Order Quantity | Latex Free | Catalog Number | Sin # |

Vein Graft Vessel Cannula

Description:

The Vein Graft Vessel Cannula is used with patients undergoing any heart, cardiopulmonary bypass or vascular surgery to help check leaks in a harvested vein which will be used for a graft.

Product Material:

- Flexible Vessel Cannula: Clear Medical Grade Class VI PVC
- Two-Way Check Valve Housing: Class VI Polycarbonate

Packaging:

EtO Sterilized

Features:

- Inlet Female Threaded Luer Connector: For Luer Lock Syringe
- Outlet Tip: Blunt or Bevel Tip with Stepped Barbs for Suture Attachment to Vein
- Outlet Tip Diameter: Approximate 2mm O.D. (Special Order 3mm O.D.)

| Description | Eaches Per Box | Minimum Order Quantity | Latex Free | Catalog Number | Sin # |

Myocardial Temperature Probe

Description:

The Myocardial Temperature Probe is used in the routine monitoring of temperature during open-heart surgery and is intended for insertion into the myocardium.

Product Material:

- Plastic Needle Housing Material: USP Class VI Acrylic
- Needle Material: #304 Stainless Steel 21 Gauge USP Class VI
- Insulated Wire Material: Flexible Stranded Two Conductor with Molded Plug

Packaging:

EtO Sterilized

Features:

- Temperature Sensor: Thermistor located inside hollow pencil point needle tip
- Temperature Range and Accuracy: 10°C to 40°C accuracy at 25°C ± 0.2°C
- Protective Plastic Tubing on Needle Tip: Removable Needle Protector
- Standard Needle Length: 8mm, 15mm, 30mm and 44mm
- (YSI 400 series compatible) direct monitor plug in design with 1/4" diameter plug and 12 foot long flexible wire. Reusable extension cable available special order, upon request.

Special Order:

(YSI 400 Series Compatible) with 6 foot long flexible wire requires 10 foot long reusable adapter cable with 1/4" diameter plug or 10 foot long reusable adapter cable with connector compatible for Hewlett Packard* monitors. (Note: For Electromedics, Inc monitors designed for 10 kohm/thermistor) with 6 foot long flexible wire requires 10 foot long reusable adapter cable with 1/8" diameter plug.

Tubing Organizers

Description:

The Disposable 8 Hole and 10 Hole Tubing Organizers are designed to secure and organize flexible tubing of various sizes in or around the sterile field and to maintain neatness which helps to eliminate kinking and/or tangling of the flexible tubing.

Product Material:

- Natural White Polypropylene
- Clear Acrylic with Two Swivel Metal Drape Clips

Packaging:

EtO Sterilized

Features:

8 Hole Organizer Tubing I.D.
(Sizes: 1/4", 3/16", 5/16", 3/8", and 1/2")

10 Hole Organizer Tubing I.D.
(Sizes: 1/4", 3/16", 5/16", 3/8", and 1/2")

8 Hole Organizer with Two Swivel Metal Drape Clips

One-Way Vent Valve

Description:

The One-Way Vent Valve is used during cardiopulmonary bypass surgery to help prevent the build up of excess vacuum pressure when suctioning either from the heart or the surgical field and to help prevent inadvertent retrograde flow and air into the heart.

Product Material:

- Housing Material: Clear Medical Grade Class VI Polycarbonate
- Duck Bill One-Way Valve with Positive and Negative Relief Valve Material: Medical Grade Class VI Silicone

Packaging:

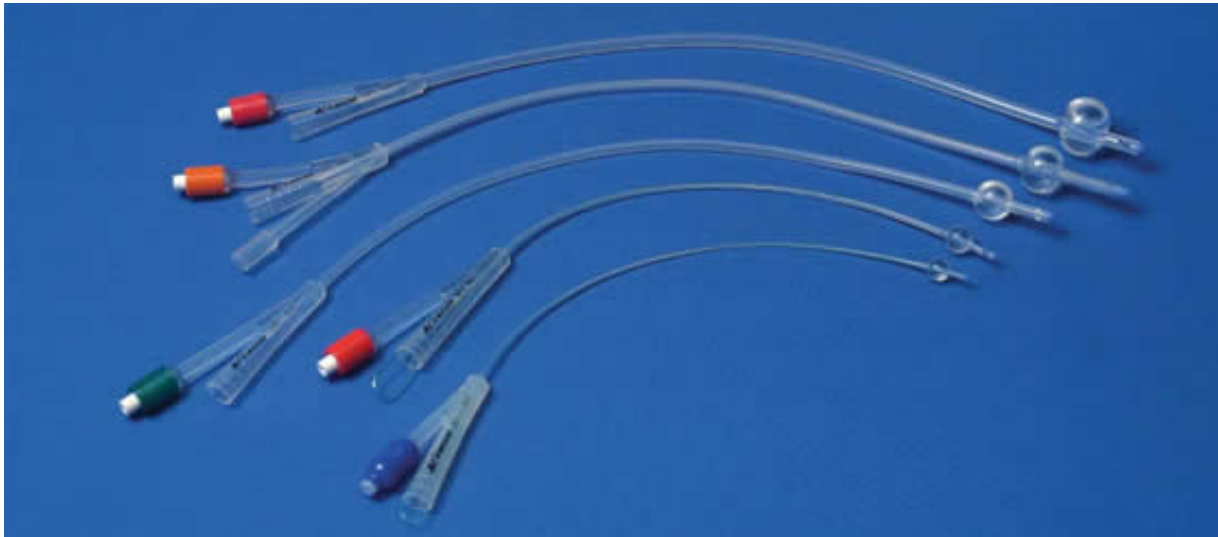

EtO Sterilized

Features:

- Inlet and Outlet Connector Ports: For ¼" I.D. Tubing
- Protection Against Retrograde Flow: Up to 3.3 L/Min
- Approximate Positive Relief Pressure: +385mm Hg
- Approximate Negative Relief Pressure: -170mm Hg

Foley Balloon Catheter

Description:

The Foley Balloon Catheter is a flexible tube with a balloon tip that is inserted into the bladder via the urethra. In order to keep the catheter in place, the tip is filled using a syringe. Removal is accomplished simply by deflating the balloon and slipping the catheter out.

Product Material:

Non-Pyrogenic USP Class VI Silicone Construction

Packaging:

EtO Sterilized

Features:

- Translucent with blue radiopaque line
- Three-Way Balloon Retention Catheters are used for continuous bladder irrigation and drainage at the same time
- Special Plastic Valve Cap allows easy inflation of the balloon and fits all common Slip Luer Syringes
- The Color Coded Bands allow easy distinction of sizes
- Cylindrical with Round Tip is a well designed lumen for urine flow and drainage
- Translucent Catheters allow ability to visually monitor crystallization formations and internal lumen blockage

Temperature Sensing Foley Catheter

Description:

The Temperature Sensing Foley Catheter is used in urethral catheterization for bladder drainage with simultaneous temperature monitoring. In order to keep the catheter in place, the tip is filled using a syringe. Removal is accomplished simply by deflating the balloon and slipping the catheter out.

Product Material:

Non-Pyrogenic USP Class VI Silicone Construction

Packaging:

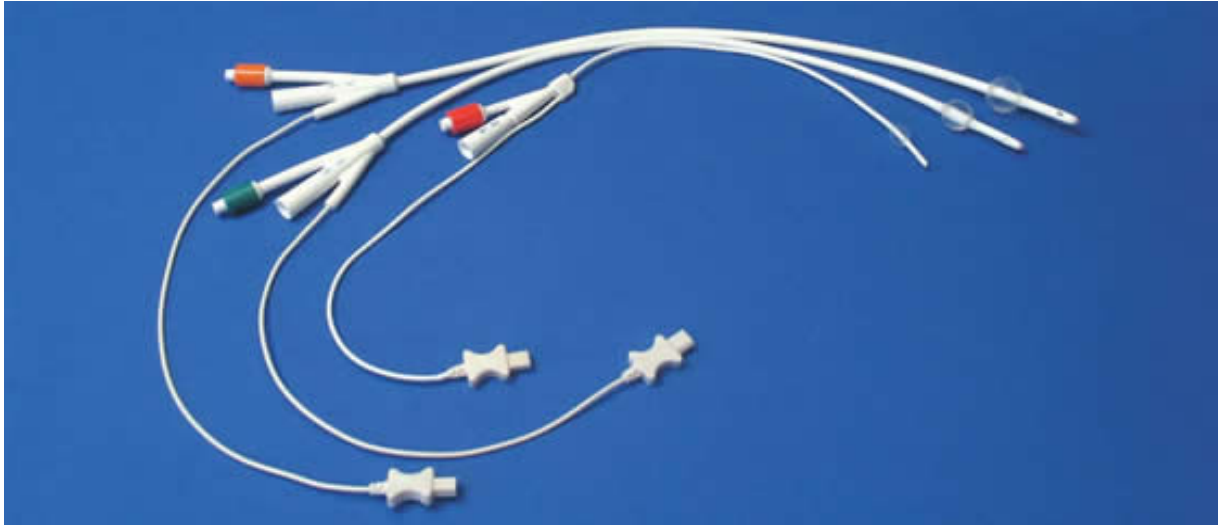

EtO Sterilized

Features:

- Industry Standard Color Coding Inflation Valves for Easy Identification (Symmetrical Balloon when Inflated)
- Temperature Range and Accuracy: 32°C to 45°C ± 0.1°C Premium Series (YSI 400 Series Compatible)
Connects to Monitor Via Reusable Adapter Cable
- 10 Foot Long Reusable Standard Adapter Cable with 1/4" Diameter Plug or 10 Foot Long Reusable Adapter Cable with Connector Compatible for Hewlett Packard* Monitors

Urinometer

Description:

The Urinometer is a collection canister used during a surgical procedure to measure urine output. The Urinometer is connected by tubes to a Foley Catheter which is inserted into the bladder for drainage purposes. The Urinometer will usually be attached to a collection bag so that when the Urinometer fills it can be drained and accurate measurements can be obtained.

Product Material:

Urinometer: Polyurethane Plastic
 Drainage Bag: Polyvinyl
 Foley: Non-Pyrogenic USP Class VI Silicone Construction

Packaging:

EtO Sterilized

Features:

- Variety
- 5cc and 30cc
- Temperature Sensing Foley and Silicone Foley
- Clear plastic for ease of viewing and handling
- Simple bottom port for drainage and easier handling ports

Nephrostomy Balloon Catheter

Description:

The Nephrostomy Balloon Catheter is used in a therapeutic procedure in which the catheter is placed through the skin into the renal collecting system to provide urine drainage where the urethra is not functional. With the assistance of image guidance, the catheter is used to introduce balloon dilation of narrowing areas within the urethra, removal of renal calculi and to diagnose urethral obstructions.

Product Material:

Non-Pyrogenic USP Class VI Silicone Construction

Packaging:

EtO Sterilized

Features:

- Open tip offers easy drainage for urine and other things in the bladder
- Well designed balloon rarely allows any leakage of urine
- Requires the minimum of space in the renal pelvis

Evacuator BaroVac® Closed Wound Drainage System

Description:

The Evacuator BaroVac® Closed Wound Drainage System is used to drain fluids, mostly blood, from surgical wounds after surgery. The purpose in using this system is to reduce the occurrence of wound hematomas and infection.

Product Material:

- Evacuator Container: PVC; Three Volume Containers in Accordance with Suction Purpose (200/400/800ml)
- Wound Tube: PVC
- Y-Connectors: PVC; For the Purpose of Two-Way Suction
- Trocar Needle – Stainless Steel; Length 130mm
- Connecting Tube: PVC; Length 72cm

Packaging:

EtO Sterilized

Features:

- PVC Container, PVC Wound Tube or Silicone Wound Tube
- Container Capacity: 200/400/800ml
- Medium (3.2mm)
- Large (4.8mm)
- X-Large (6.4mm)
- Negative Pressure: 90mm Hg (+/-5)
- 2-Way P.C. Connectors

Suction Catheter (PVC) with Valve

Description:

The Suction Catheter with Valve is for removal of secretion from Tracheal and Bronchial Tubes. The Catheter is made of soft PVC and extra smooth low friction surface for easy intubation. The Catheter is usually connected to a suction device and inserted through a tube to remove secretion.

Product Material:

Disposable PVC

Packaging:

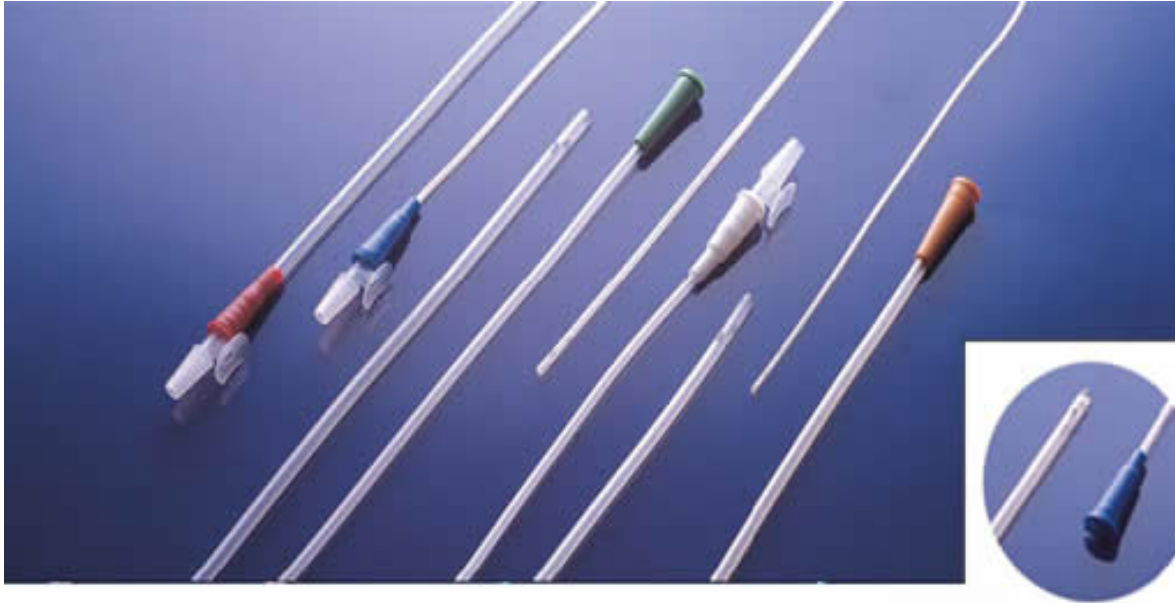

EtO Sterilized

Features:

- Vacuum Controlled Valve with open tip of suction facilitates control of suction
- Pediatric Suction Catheters are manufactured to very high standards with central eyes that are smoothly rounded and lateral eyes that are accurately positioned and shaped to avoid sharp edges
- Length: 47cm including valve

Suction Catheter (PVC) without Valve

Description:

The Suction Catheter without Valve is for removal of secretion from Tracheal and Bronchial Tubes. The Catheter is made of soft PVC and extra smooth low friction surface for easy intubation. The Catheter is usually connected to a suction device and inserted through a tube to remove secretion.

Product Material:

Disposable PVC

Packaging:

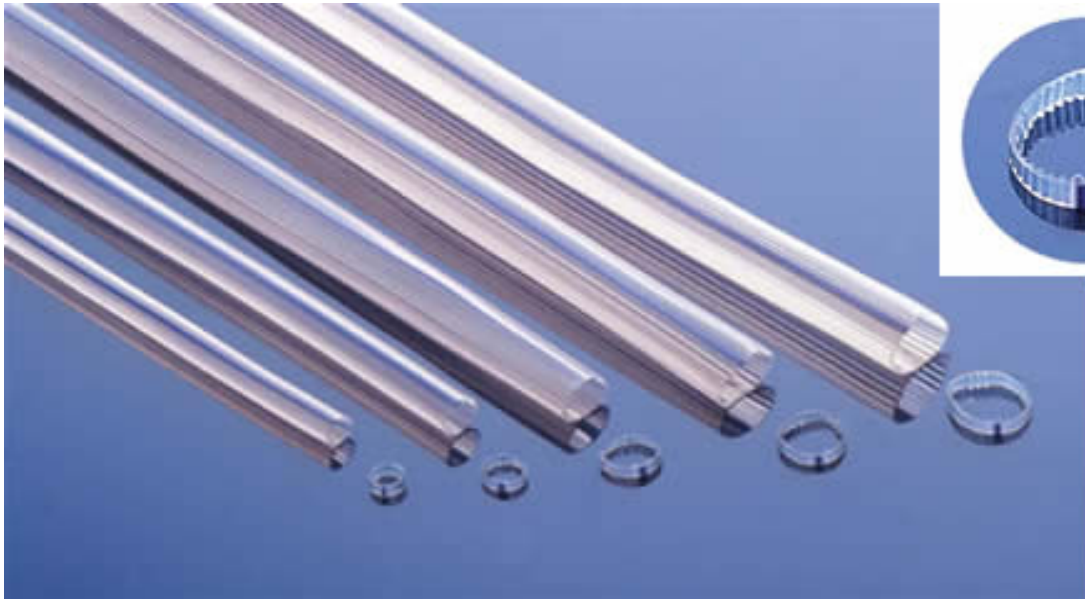

EtO Sterilized

Features:

- Pediatric Suction Catheters are manufactured to very high standards with central eyes that are smoothly rounded and lateral eyes that are accurately positioned and shaped to avoid sharp edges

Penrose Drainage Tube

Description:

The Penrose Drainage Tube is inserted into the body after an operation for drainage.

Product Material:

Silicone

Packaging:

EtO Sterilized

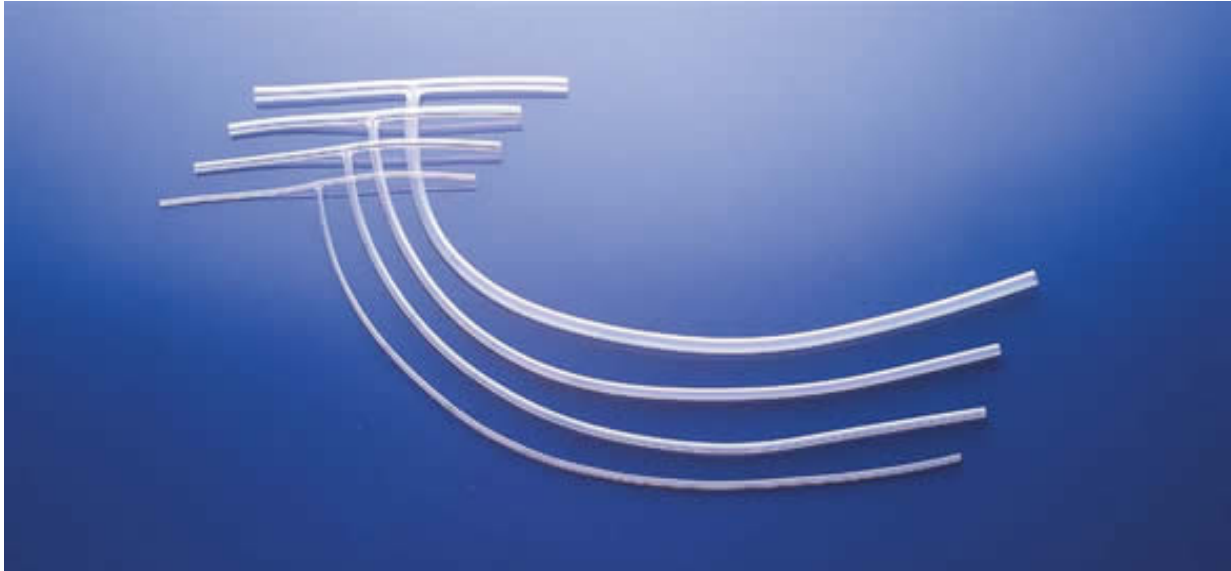

Features:

- Silicone Elastomer to prevent the adhesion of blood and body fluids
- Special ribbed inside wall for fast drainage and easy liquid flow without clog
- Drains have a blue radiopaque line which confirms the exact positioning of the tubes in the body

Any special sizes, outer diameters or any lengths are available for marking, upon request.

T-Drainage Tube

Description:

The T-Drainage Tube is a self-retaining drainage tube in the shape of a T used in surgery to facilitate the escape of fluids.

Product Material:

Silicone

Packaging:

EtO Sterilized

Features:

- Removal of the conventional structural problems
- Perfect seaming of the horizontal tubes with the vertical tubes
- Smooth drainage through the soft horizontal tubes with the vertical tubes resists being crushed or kinked
- Entire tubes have a striped blue radiopaque line
- Proper and large lumen for good drainage in accordance with size
- Length for the horizontal tube; 180mm and for the vertical tube; 450mm
- Translucent

Sump Drain

Description:

The Sump Drain organizes into a large central drainage lumen bordered by two high-flow sump lumens. The two sump lumens make high internal flow rates for speedy and efficient removal of blood and other fluids.

Product Material:

Silicone

Packaging:

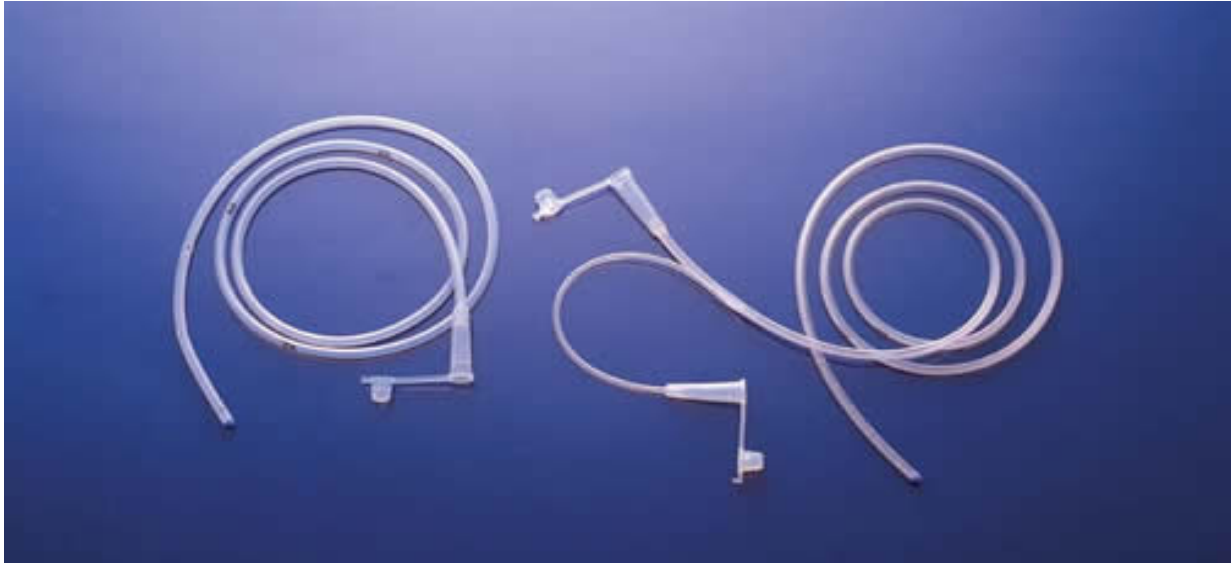

EtO Sterilized

Features:

- Sump Drain will solve the problem of tough drainage
- Two different types of drainage holes

| Description | Eaches Per Box | Minimum Order Quantity | Latex Free | Catalog Number | Sin # |

Gastric Duodenal Levin Tubes Single and Double

Description:

Gastric Duodenal Levin Tubes are used for external feeding, gastric suction and irrigation. For the double lumen, tubes are divided into two parts, one lumen is for irrigation and the other is for the feeding purposes at the same time.

Product Material:

Silicone

Packaging:

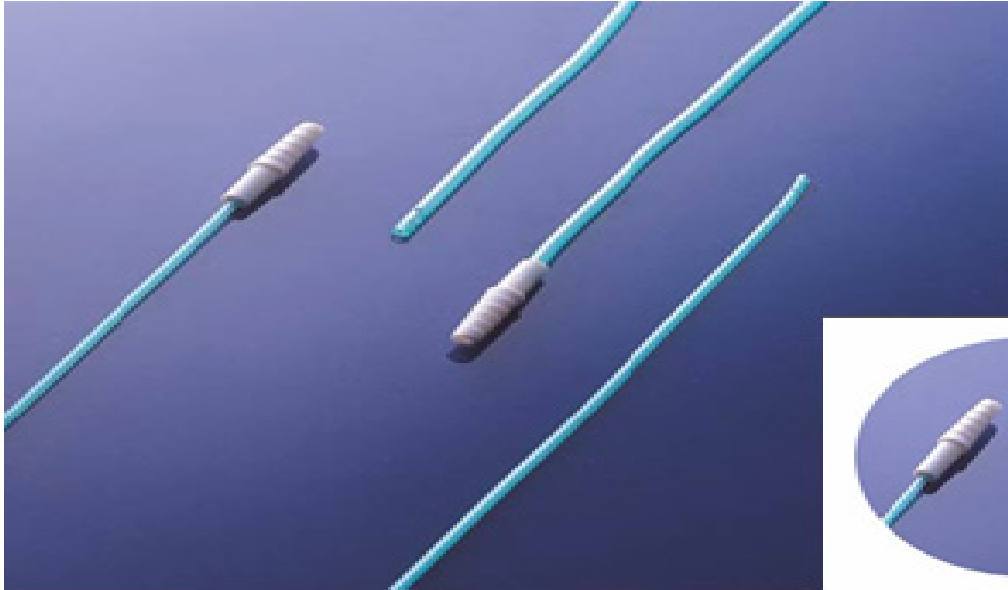

EtO Sterilized

Features:

- Tubes are graduated at 50/60/70/80/90cm in 10cm intervals from the proximal end to determine the exact indwelling positioning and the correct intubation
- Four lateral eyes located from the proximal end provides the most drainage and irrigation effectiveness and minimizes the blockage of the tube lumen

Twin Nasal Oxygen Cannula

Description:

The Twin Nasal Oxygen Cannula is used for oxygen delivery supplemental oxygen to a patient in need of extra oxygen. Oxygen flows through a plastic tube which fits around the head and has a set of prongs that are placed in the nose of the patient. The tube is connected to an oxygen tank.

Product Material:

Medical Grade PVC

Packaging:

EtO Sterilized

Features:

- Cannula Tip is controlled by patients in accordance with the purposes
- Wide open tips are for large volume oxygen delivery
